DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- A) Claims 1-12, drawn to a system for network to computer interfacing classified in class 709, subclass 250.
- B) Claims 13-20, drawn to a method for power conservation classified in class 713, subclass 320.

The inventions are distinct from each other for the following reasons:

Inventions A and B, are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention A has separate utility for loading data in a communication device, which is separately usable with or without invention B, which has utility for saving power in a communication device. See § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Conclusion

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hassan Phillips whose telephone number is (571) 272-3940. The examiner can normally be reached on M-F 8:00am-5:00pm.
